### PROFESSIONAL SUMMARY

Results-driven Senior Quality Analyst and QA Team Lead with 5.5+ years of hands-on manual testing experience in the BFSI domain at Aadiswan Info Consultants Pvt. Ltd. Leads a 5-member QA team - task allocation, test case review, and delivery sign-off - while remaining hands-on with test design, execution, and production support. Specializes in testing Aadiswan's banking product suite - CredPro (Loan Origination and Management), CADPro (Credit Administration and Documentation), EWSPro (Early Warning Signal), and ESMSPro (Environmental Sustainability Management) - for RBL Bank, AU Small Finance Bank, and IndusInd Bank, while overseeing QA delivery for Ujjivan Small Finance Bank through a dedicated team member. Strong in credit risk validation, regulatory and compliance testing (KYC, AML, NPA, RBI guidelines), and SQL Server-based data integrity verification. Proficient in Agile/Scrum, Jira-based defect lifecycle management, and direct UAT coordination with bank stakeholders. Seeking a Senior QA Analyst, Test Lead, or Test Manager role - open to Remote (India), Hybrid, or on-site opportunities in Delhi-NCR/Noida.

### KEY SKILLS

**Leadership and Management:** QA Team Lead (5 Members), Task Allocation, Test Case Review, Project Ownership, End-to-End Delivery, Client and Stakeholder Management, Mentoring, Escalation Management, Production Support Ownership

**Testing Types:** Manual Testing, Functional, Regression, System, UAT, SIT, Smoke, Sanity, Integration, Exploratory, Ad-hoc, Black Box, Grey Box, End-to-End Testing, Test Case Design, Boundary Value Analysis, Equivalence Partitioning

**BFSI and Banking Domain:** Financial Services, Loan Origination System (LOS), Loan Management System (LMS), Core Banking, Credit Administration (CAD), Early Warning Signal (EWS), ESG/Sustainability Compliance (ESMS), Underwriting, Covenant Management, Credit Risk, Credit Risk Validation, Risk Management, Regulatory and Compliance Testing, KYC, AML, NPA Classification, Loan Disbursement, EMI Calculation, Repayment Schedules, RBI Guidelines, Audit Trail Validation, NBFC Testing

**Product Platforms Tested:** CredPro (LOS/LMS), CADPro, EWSPro, ESMSPro - Aadiswan's flagship BFSI product suite

**Tools and Technologies:** Jira, SQL Server (Data Validation and Reconciliation Queries), MS Excel, Test Case Management, Defect Lifecycle Management

**Methodologies:** STLC, SDLC, Agile Methodology, Scrum Framework, Sprint Planning, Daily Standup, Sprint Retrospective, Test Planning and Strategy, Requirement Traceability Matrix (RTM), Risk-Based Testing, Test Closure Reporting

**Banking Clients:** RBL Bank | AU Small Finance Bank | IndusInd Bank | Ujjivan Small Finance Bank

### WORK EXPERIENCE

#### Senior Quality Analyst - QA Team Lead | Aadiswan Info Consultants Pvt. Ltd.

April 2021 - Present (5.5+ Years) | New Delhi, India | Remote-Ready

**Key Banking Clients:** RBL Bank | AU Small Finance Bank | IndusInd Bank | Ujjivan Small Finance Bank

#### Team Leadership and Project Management

- Lead a 5-member QA team with end-to-end project ownership - test planning, task allocation, execution oversight, and release sign-off across all banking client projects.
- Allocate sprint-level testing tasks based on module complexity, individual tester strengths, and release timelines; track all progress in Jira.
- Review all test cases, defect reports, requirement traceability matrices (RTM), and test summary documents before client and stakeholder delivery to ensure quality completeness.
- Serve as primary escalation point and delivery owner for 4 concurrent banking client projects, coordinating directly with bank business teams and internal management.
- Oversee QA delivery for Ujjivan Small Finance Bank through a dedicated team member - assign and monitor tasks, review test coverage, and resolve day-to-day testing and domain queries.

- Mentor junior QA engineers on BFSI domain concepts, SQL Server data validation, Jira defect lifecycle, and professional documentation standards.

### Production Support

- Own production support for live banking applications - triage, reproduce, and perform root-cause analysis (RCA) of production defects in coordination with development teams.
- Validate all production hotfixes and emergency patches before sign-off to prevent regression and minimize post-release incidents.
- Monitor post-release system stability using SQL Server queries to proactively detect data anomalies, reconciliation failures, and processing errors.
- Maintain SLA-based production issue logs and resolution tracking in Jira; generate incident reports for management and client review.

### Quality Assurance, Banking Domain Testing and Manual Testing

- Designed 1,200+ and executed 3,500+ test cases across functional, regression, integration, UAT, and SIT phases for LOS and LMS banking platforms across 3 major bank clients.
- Performed SQL Server data validation queries to verify loan disbursement accuracy, interest calculation logic, EMI schedules, repayment data, and backend database integrity across all banking domain modules.
- Managed 600+ defects end-to-end in Jira - logging, severity and priority classification, developer coordination, retesting, and closure within sprint timelines.
- Conducted UAT sessions directly with business stakeholders at RBL Bank, AU Small Finance Bank, and IndusInd Bank - ensuring regulatory compliance and business requirement sign-off before go-live.
- Executed compliance and regulatory testing for KYC workflows, AML screening modules, audit trail logs, credit risk validation, and NPA classification as per RBI guidelines.
- Tested credit risk modules including credit scoring, underwriting decisioning, covenant monitoring, Early Warning Signal (EWS), and Credit Administration (CAD).
- Tested ESMSPro (Environmental Sustainability Management System) for IndusInd Bank - validating automated ESG compliance reporting and environmental impact tracking modules.
- Verified data accuracy across third-party integrations - credit bureau connectivity, document management systems, and core banking interfaces - through functional and backend validation.
- Collaborated in Agile and Scrum ceremonies - sprint planning, daily standups, and retrospectives - contributing test estimates, risk identification, and quality feedback.
- Maintained a consistently low critical-defect leakage rate to production across all 3 banking client deployments over 5+ years of BFSI quality assurance delivery.
- Created and maintained Test Plans, Test Strategy documents, Test Execution Reports, Defect Summary Reports, and Test Closure documents for management and client review.

## EDUCATION

---

### Bachelor of Technology (B.Tech) | BPUT - Biju Patnaik University of Technology

*Year of Passing: 2013 | Odisha*

*Note: Post-graduation, pursued government sector competitive examinations (2013-2021) before transitioning to IT and Software Testing in April 2021.*

## CERTIFICATIONS AND TRAINING

---

- Manual Testing and Automation Testing - Ducat Institute, New Delhi (Software Testing, STLC, SDLC, Test Case Design, Defect Management, Basic Automation Concepts)

## KEY ACHIEVEMENTS

---

- Sustained a strong track record of minimal critical post-production defects across RBL Bank, AU Small Finance Bank, and IndusInd Bank over 5+ years of continuous BFSI banking domain testing.
- Led a 5-member QA team delivering 15+ successful release cycles across 4 banking clients with consistent on-time delivery and quality sign-off.
- Designed 1,200+ test cases, executed 3,500+ test cases, and managed 600+ defects across LOS and LMS banking domain platforms.
- Recognized by senior management for combining deep BFSI domain expertise with effective team leadership, direct client communication, and production support ownership.
